

# VACCINATION attributes to decrease in hospital admissions

PLATINUM  
HEALTH

The graph below indicates that Platinum Health (PH) has seen a marked decrease in members being hospitalised during the Fourth and (current) Fifth Covid-19 waves, compared to the previous waves. This can be attributed to members being vaccinated, having been exposed to the virus (thus gaining natural immunity), or a combination of both.

## Hospital Admissions per Covid-19 Wave

Platinum Health (PH) wants to thank those members who have been vaccinated.

We encourage those members who have not yet vaccinated, to get vaccinated, and those who qualify should get the booster shot too, as it will provide them with maximum protection.

Platinum Health values each and every member!

You can visit any Covid-19 vaccination site and PH will cover the costs!

The fact of the matter is that Covid-19 will be part of our lives for a long time to come and therefore it is of utmost importance that we all protect ourselves at all costs. This is especially important for members who suffer from chronic medical conditions.
