

Water and electricity problems experienced at Mogwase Clinic

PLATINUM
HEALTH

For the past months, Mogwase Clinic has experienced intermittent water and electricity interruptions.

This has unfortunately resulted in the Mogwase Clinic being closed during the affected days due to the health risk of operating the clinic without water.

Platinum Health (PH) does not receive notification from the municipality prior to water interruptions or power cuts, therefore the Scheme has not been able to notify members timeously.

PH has been engaging with the landlord in resolving the matter and we're also looking at alternatives.

We sincerely apologise for any inconvenience caused.
