

COVID-19 VACCINE DO NOT CONTAIN A MICROCHIP

PLATINUM
HEALTH

A lot of misinformation about the COVID-19 vaccine has been doing the rounds. The fact of the matter is, the COVID-19 vaccine saves lives. Empower yourself by knowing the facts.

MYTH:

Vaccines contain a microchip for tracking individuals.

FACT:

Vaccine manufacturers are required to declare their ingredients to the South African Health Products Regulatory Authority (SAHPRA) before vaccine use approval.

*Despite the conspiracy theories, **they do not contain microchip or any tracking devices.***

If they did contain such items, SAHPRA and other authorities worldwide, will not authorise their use.

In reality; there are far easier ways to track the population using mobile phones, social media apps, or bank cards, etc. than biological trackers.

**Make the right choice
- GET VACCINATED!**
