

COVID-19 VACCINE

Are you willing to risk your life, because you don't know the facts?

PLATINUM
HEALTH

A lot of misinformation about the COVID-19 vaccine has been doing the rounds. The fact of the matter is, the COVID-19 vaccine saves lives. Empower yourself by knowing the facts.

MYTH:

COVID-19 vaccines are unsafe and normal safety protocols have been ignored.

FACT:

Scientists have been able to take lessons from previous vaccines and produce a COVID-19 vaccine much quicker due to the global need.

Using years of previous research on related viruses and vaccines and faster ways to manufacture vaccines, scientists and pharmaceutical companies around the world have collaborated, pooling resources and technology. Enormous funding has been used to run multiple trials in parallel.

No step, in development, testing, regulation or authorisation of the COVID-19 vaccines has been skipped.

The unprecedented socio-economic devastation of COVID-19 has motivated vaccine manufacturers and researchers to move with urgency but without compromising on quality standards.
